RURAL IMPACT

What's new?

Between November 2024 and July 2026, the Rural Impact project partners researched and developed the content for Social Entrepreneurship Online Modules (WP2) with the aim of supporting young VET students in rural communities to develop skills to launch and maintain social enterprises. During this time, the partners also started creating the Up-skilling Programme for VET Professionals (WP3) with the aim of developing the digital skills of VET professionals, including proficiency in the use of online tools, educational platforms and digital resources. These materials will be translated into 5 languages: EN, PT, HR, RO and BG.

Peer Review Meeting in Ireland:

Project partners were delight to attend the first face to face meeting in Navan, Ireland on 17th June. At the meeting, partners had the opportunity to get together and review all the collective work at this mid-point in the project, and to review each other's work and suggest improvements and refinements to the content and the online platform.
We want to take this opportunity to thank WeLearn for a well-organised and efficient meeting.

This was an important mileston in the project, as allowed partners to finalise Rural Impact resources and to prepare for the translations of the materials, and the piloting of these resources at the transnational piloting in Portugal. **Stay tuned!**
